

Review-Quote-Accept Loop

The Status Lifecycle (Admin Side)

1. Awaiting Quote (The "Lead" Stage):

- The system holds the user's data and the *Estimated Fare* (like ¥16,940).
- **Admin Action:** The operator checks vehicle availability and route feasibility. If the user requested an English-speaking driver or a specific child seat, the operator verifies these assets.

2. The "Pivot" (Adjustments):

- **Case A (Straight Pass):** Operator confirms the estimate is the final price.
- **Case B (Adjustment):** Operator modifies variables (e.g., adding a late-night surcharge not caught by the auto-calc, or upgrading the vehicle class if the requested one is booked out).

3. Quoted (The "Offer" Stage):

- The operator triggers the **Send Quotation** action.
- **The Payment Link:** This acts as the "Gatekeeper." By attaching an expiration date, you're protecting your fleet capacity from being "held" indefinitely by unconfirmed bookings.
- The ball is now back in the user's court.

4. Customer Confirmation (The "Commitment" Stage):

- Payment serves as the ultimate "Acceptance" of the contract.
 - If the price changed (Case B), the user's act of paying constitutes agreement to the new terms.
-

The Record Stage Hierarchy

- The record converts in these steps

Stage	Name	Reason
Initial Submission	Booking Request	"Lead" implies a sales follow-up. "Request" implies a specific intent to travel. It keeps the user feeling like they' ve started a process, not just signed up for a newsletter.
Operator Confirmed	Quotation	Once the admin reviews it, it becomes a formal offer with an expiration date.
User Paid	Confirmed Booking	This is now an Order . It is a financial commitment and a reserved asset in your fleet

The Lifecycle Progression

Status Tag	Ownership	Trigger Action
PENDING_REVIEW	Operator	User submits the form. Admin is notified.
MODIFIED	Operator	Adjustment Required: Admin finds issue (e.g., flight time doesn't match pic
QUOTED	Customer	Admin clicks "Send Quote." A payment link is emailed; an expiration timer s
EXPIRED	System	The expiration date passes without payment. The car is "released" back to i
CONFIRMED	System/Ops	The Flip; request -> order. Payment is verified via API (Stripe/PayPal). The an "Order."
DISPATCHED	Driver	A driver is assigned and has accepted the trip.

Booking Lifecycle (admin perspective)

With "Cancel Logic":

- Cancel is an option for either party" up until Confirmed:
- **For the Operator:** This is usually a "Decline" or "Reject" action (e.g., "No vehicles available").
- **For the User:** This is a "Withdrawal" of the request.

Status Tag	Ownership	Trigger Action	Termination P
PENDING	Operator	User submits the web form. Record is created.	DECLINED: Op WITHDRAWN:
UNDER_REVIEW	Operator	Admin takes ownership of the record to check logs/ adjust prices.	DECLINED: Ad
QUOTED	Customer	Admin sends the payment link. Expiration timer starts.	EXPIRED: Cust WITHDRAWN:
CONFIRMED	System/Ops	The Flip. Payment is verified. Record becomes an "Order."	CANCELLED: R
DISPATCHED	Driver	Driver assigned. Vehicle is locked to this trip.	CANCELLED: +
COMPLETED	N/A	Trip ended. Telemetry shows drop-off finished.	N/A

Booking Lifecycle with Assignment State

Current SQL Status	Ownership	Assignment State	Description / Exit Logic
DRAFT	Customer	N/A	User is still in the frontend flow (Video 0:00-0:40).
PENDING_REVIEW	Operator	Unassigned	Entry Point: User submitted. Admin Console displ
UNDER_REVIEW*	Operator	Allocated	Optional UI state: Admin has opened the record an
AWAITING_USER_APPROVAL	Customer	Allocated	The Quote: Admin sent a price adjustment. This re
AWAITING_PAYMENT	Customer	Allocated	Admin has sent the final Quotation. A payment_int
CONFIRMED	System	Assigned	The Flip: Payment status in SQL moves to SUCCEE
CANCELLED	N/A	N/A	The Exit: Can happen manually at any stage. If stat

The Refined Assignment Logic

Status Tag	Assignment State	Description
PENDING_REVIEW	Unallocated	The trip is a "floating" request. No specific asset has been
AWAITING_PAYMENT	Allocated	(Soft Lock) A vehicle and driver are "penciled in." They are expires, but the driver hasn't officially started their shift fo
CONFIRMED	Assigned	(Hard Lock) The asset is legally and operationally locked. this trip.

Comparison Summary: Assignment State

Term	Allocated	Assigned
Context	Pre-Payment / Quote	Post-Payment / Confirmation
Commitment	Flexible (Operator can swap)	Rigid (Contractual)
Inventory Availability	Earmarked / Optioned	Booked / Out of Pool

Customer Booking Lifecycle & Status Chart

Ex.	Visual Status Tag	Customer Perspective (What it means)
1	REQUEST SUBMITTED	"We've received your trip details. A Reference ID has been generated."
2	UNDER REVIEW	"An operator is checking vehicle availability and local logistics."
3	AWAITING PAYMENT	"A vehicle is Allocated . Please pay by the expiration date to secure the car."
4	PAYMENT PROCESSING	"We are verifying your transaction with the bank."
5	BOOKING CONFIRMED	"Payment successful! Your trip is officially booked and the asset is Assigned ."
6	DRIVER ASSIGNED	"Meet your chauffeur. Details (Name, Plate, Phone) are now visible."
7	TRIP ACTIVE	"Your service is currently in progress."
8	COMPLETED	"Trip finished. Thank you for riding with Zengo!"

Status Changes (Standard): Customer vs. Admin View

Customer Status Badge	Admin Status Badge	Trigger Action	Source
DRAFT	<i>Draft</i>	User begins form but hasn't submitted.	Customer
PENDING REVIEW	AWAITING_REVIEW	User clicks "Submit Booking."	Customer
<i>(No Change)</i>	UNDER_REVIEW	Operator opens the record to begin work.	Operator
<i>(No Change)</i>	MODIFIED	Operator adjusts fare, vehicle, or time.	Operator
AWAITING PAYMENT	AWAITING PAYMENT	Operator sends the payment link/quote.	Operator
CONFIRMED	CONFIRMED	Payment verified (Stripe/Bank).	System
<i>(No Change)</i>	AWAITING ASSIGN		
<i>(No Change)</i>	ASSIGNED	Admin finalizes the hard lock on the driver/car.	Operator
RIDE IN PROGRESS	<i>RIDE IN PROGRESS</i>	Driver starts the trip (GPS/Manual).	System/Driver
COMPLETED	COMPLETED	Drop-off confirmed.	System/Driver
